PROFESSIONAL SUMMARY

B.E. Artificial Intelligence & Machine Learning student aspiring to build a career in Data Analytics, with hands-on experience in Excel, Google Sheets, Power BI, Python, SQL, data cleaning, data analysis, and data visualization. Experienced in developing interactive dashboards, analyzing datasets, identifying trends and patterns, and building data-driven applications.

EDUCATION

Bachelor of Engineering – Artificial Intelligence & Machine Learning <i>RajaRajeswari College of Engineering, Bangalore</i>	Expected 2027 <i>CGPA: 8.0</i>
---	--

TECHNICAL SKILLS

Data Analytics: Excel, Google Sheets, Power BI, Tableau, Data Cleaning, Data Analysis, Data Visualization, KPI Analysis
Programming & Databases: Python, SQL, MongoDB
AI / ML: Machine Learning, AI-Assisted Analytics, RAG
Web & Technologies: React, TypeScript, Node.js, Express.js, REST APIs, HTML, CSS
Tools: Git, GitHub, VS Code, Microsoft PowerPoint, Canva

PROJECTS

BagBill – Digital Billing and Business Record System	<i>React, TypeScript, Node.js, Express.js, MongoDB</i>
---	--

- Developed a full-stack digital billing application to replace manual business billing and record management.
- Implemented GST invoice generation, automated calculations, payment tracking, sequential invoice numbering, and PDF invoice generation.
- Built Bill Book, Party Ledger, Product Management, Dashboard, Reports, and Settings modules with persistent data storage.
- Integrated React frontend with Express.js REST APIs and MongoDB for storing and retrieving business records.

Data Detective AI – AI-Assisted Data Analytics	<i>Python, AI/ML, RAG, Data Analysis</i>
---	--

- Developed an AI-assisted data analytics application that allows users to upload datasets, explore data, identify data quality issues, and uncover meaningful insights.
- Implemented automated data analysis and visualization workflows to identify trends, patterns, missing values, and potential anomalies.
- Integrated Retrieval-Augmented Generation (RAG) to provide context-aware, dataset-specific responses and insights from uploaded datasets.
- Combined automated analytics with natural-language interaction to simplify dataset exploration and insight generation.

E-Commerce Sales Analysis	<i>Excel / Power BI</i>
----------------------------------	-------------------------

- Analyzed e-commerce sales data to identify revenue trends, product performance, and sales patterns.
- Built interactive dashboards and visualizations to identify trends and derive data-driven insights.

Pizza Sales Analysis Dashboard	<i>Power BI</i>
---------------------------------------	-----------------

- Analyzed sales data to evaluate revenue, order trends, customer preferences, and product performance.
- Built an interactive Power BI dashboard highlighting best-selling products, peak order periods, and category performance.

Global Population Dashboard	<i>Power BI</i>
------------------------------------	-----------------

- Developed an interactive dashboard to analyze global population trends across countries and years.
- Visualized population growth, density, and regional comparisons using charts, maps, filters, and slicers.

CERTIFICATIONS

- Data Science and Analytics
- Data Visualization using Power BI
- AI for Beginners

KEY HIGHLIGHTS

- Hands-on experience in data analysis, data cleaning, visualization, and interactive dashboard development.
- Built multiple analytics projects using Power BI and Excel to identify trends and derive actionable insights.
- Strong analytical thinking and attention to detail with practical experience applying data-driven approaches.
