## PROFESSIONAL SUMMARY

B.E. Artificial Intelligence and Machine Learning student aspiring to build a career in Data Analytics. Hands-on experience in Excel, Power BI, Python, SQL, data cleaning, data analysis, and data visualization. Experienced in developing interactive dashboards, analyzing datasets, identifying trends and patterns, and building data-driven applications. Familiar with business reporting, KPI analysis, database management, and REST API-based applications.

## EDUCATION

**RajaRajeswari College of Engineering**, Bangalore, India

**Expected 2027**

Bachelor of Engineering in Artificial Intelligence and Machine Learning

CGPA: 7.7

## TECHNICAL SKILLS

**Data Analytics:** Excel, Google Sheets, Power BI, Tableau, Data Cleaning, Data Analysis, Data Visualization, KPI Analysis

**Programming:** Python, SQL

**Databases:** MongoDB

**Web and Backend:** React, TypeScript, Node.js, Express.js, REST APIs, HTML, CSS

**AI and Machine Learning:** Machine Learning, AI-Assisted Analytics

**Tools:** Git, GitHub, VS Code, PowerPoint, Canva

## PROJECTS

**BagBill – Digital Billing and Business Record System** *React, TypeScript, Node.js, Express.js, MongoDB*

- Developed a full-stack digital billing application to replace manual business billing and record management.
- Implemented GST invoice generation, automated calculations, payment tracking, sequential invoice numbering, and PDF invoice generation.
- Built Bill Book, Party Ledger, Product Management, Dashboard, Reports, and Settings modules with persistent MongoDB storage.
- Integrated React frontend with Express.js REST APIs and MongoDB for storing and retrieving business records.

**Data Detective AI – AI-Assisted Data Analytics**

*Python, AI/ML, Data Analysis*

- Developed an AI-assisted data analytics application to simplify dataset exploration and uncover meaningful insights.
- Implemented data analysis and visualization workflows to identify trends, patterns, and potential anomalies in datasets.

**E-Commerce Sales Analysis**

*Excel, Power BI*

- Analyzed e-commerce sales data to identify revenue trends, product performance, and sales patterns.
- Built interactive dashboards to visualize key performance indicators and derive data-driven business insights.

**Pizza Sales Analysis Dashboard**

*Power BI*

- Analyzed sales data to evaluate revenue, order trends, customer preferences, and product performance.
- Built an interactive Power BI dashboard highlighting best-selling products, peak order periods, and category performance.

## CERTIFICATIONS

- Data Science and Analytics
- Data Visualization using Power BI
- AI for Beginners
